

I _____ request that NADR shares aggregated anonymized GEBV data with PDA for
(name of participant/herd owner)
 the purpose of monitoring CWD susceptibility in the larger population of captive cervids within the Commonwealth for the Chronic Wasting Disease (CWD) Susceptibility Subsidization Program for the 2023-2024 grant period. I also authorize NADR to release data to PDA for the purposes of ensuring financial accountability in the use of grant funds. I agree to maintain official ID on all tested deer as long as they are in my possession and, upon death, each tested deer shall be tested for CWD at the Pennsylvania Veterinary Laboratory (PVL). If an official ID is lost, then I will promptly replace it with another official ID and update my records immediately on the inventory forms and submit to PDA. I authorize PDA and PVL to share the results of the CWD test and official animal ID information with Dr. Chris Seabury to further his research.
